MDK3_MDK4 Documentation

Introduction

MDK3 and MDK4 are Wi-Fi stress testing tools used for DoS and penetration testing. They send crafted packets to disrupt or analyze wireless networks.

Features

- Beacon flood attacks.

- Deauthentication and disassociation attacks.

- Probe request floods.

- Authentication DoS attacks.

Installation

MDK3:

git clone https://github.com/wi-fi-analyzer/mdk3-master

cd mdk3-master && make

MDK4:

sudo apt install mdk4

Usage

Deauth attack (MDK3):

sudo mdk3 wlan0mon d -b blacklist.txt -c [channel]

Beacon flood (MDK4):

sudo mdk4 wlan0mon b -s 100

Disclaimer

These tools are disruptive and should only be used in controlled environments with permission.

Conclusion

MDK3/MDK4 are powerful for stress-testing wireless networks but must be used responsibly.
